ARTICLE 1

How to Reset Your Password

Who this is for

Users who cannot access their account because they forgot their password or their current password is not working.

Steps

1. Go to the login page.
2. Click "Forgot Password."
3. Enter the email address linked to your account.
4. Open the password reset email.
5. Click the reset link.
6. Create a new password.
7. Return to the login page and sign in again.

Common mistakes

- Using an old reset email
- Entering the wrong email address
- Adding spaces before or after the email
- Trying too many times and triggering temporary lock

Contact support if

- You did not receive the reset email
- The reset link is expired
- You see an account lock message
- You no longer have access to your email

ARTICLE 2

Why Your Crypto Deposit May Be Delayed

Who this is for

Users who sent crypto but do not see it in their account balance yet.

Main reasons

- The blockchain transaction has not received enough confirmations
- The wrong network was selected
- The deposit address was incorrect
- The transaction is under manual review
- The network is congested

What to check

- Check your transaction hash/TXID.
- Confirm the network used.
- Confirm the deposit address.
- Check the blockchain explorer.
- Wait for the required network confirmations.

Contact support with

- TXID
- Network used
- Deposit address
- Amount
- Transaction time
- Screenshot if available

ARTICLE 3

How to Avoid P2P Payment Disputes

Who this is for

P2P buyers and sellers who want safer trading habits.

Tips

- Only use the payment method listed in the order
- Make sure the payment name matches the verified account name
- Do not mark payment as completed before sending funds
- Do not release crypto before confirming payment
- Keep all communication inside the platform chat
- Upload clear payment proof when requested

Warning

Never release crypto based only on a screenshot. Confirm that the funds are actually received in your account.

ARTICLE 4

How to Report a Technical Bug

Who this is for

Users who need to report an app, dashboard, payment, upload, or account issue clearly.

What to include

- What you were trying to do
- What happened instead
- Screenshot or screen recording
- Device type
- Browser or app version
- Time the issue happened
- Steps to reproduce the issue

Good bug report example

I clicked "Withdraw," selected USDT, entered the amount, and clicked continue. The page showed a loading spinner and did not move to the next step. I tested this on Chrome and mobile app, and the issue only happens on Chrome.

ARTICLE 5

How to Protect Your Account from Phishing

Who this is for

Users who want to avoid account compromise, fake links, and social engineering.

Tips

- Do not share your password or 2FA code
- Check the website URL before logging in
- Avoid clicking unknown links from Telegram or email
- Use a strong unique password
- Enable two-factor authentication
- Contact support if you see suspicious activity
